
intake-nested-yaml-catalog Documentation

Release 0.1

aiplat@zillow.com

Oct 22, 2019

Contents

1	Indices and tables	3
----------	---------------------------	----------

This is an [Intake](#) plugin supporting a single YAML hierarchical catalog to organize datasets and avoid a data swamp.

```
metadata:
  hierarchical_catalog: true  # required entry!
entity:
  description: "description"
  customer:
    customer_attributes:
      args:
        urlpath: s3://foo
      driver: parquet
  user:
    user_profile:
      args:
        urlpath: s3://foo
      driver: parquet
```

Can be accessed as

```
df = cat.entity.customer.customer_attributes.read()
```

CHAPTER 1

Indices and tables

- `genindex`
- `modindex`
- `search`
